

v1.1 Release Notes

iOS Hotfix 2.1.1

<https://github.com/LP-Messaging/iOS-Messaging-SDK/releases/tag/2.1.1>

- includes the iOS v.2.1.1 frameworks in the plugin src to fix 2 key bugs documented in the link above.
- follow the INSTALL-IOS.md file for instructions and notes.

this version of the plugin includes ...

- authentication first attempt with hard coded JWT example
- callback functions using wrapper class
- Android callbacks using iOS naming conventions
